Loue. 1625.

# A new Almanacke, or Prognostication, with the *Arabian* or *Turkish*, with the *Persian*, as also *Latine* and Roman or Forraigne accounts beyond Seas.

The time of Sunne rise and setting, the length of the dayes and nights, the Moones changes, with rules of husbandry, and Phisicall directions for this present yeare of Grace, 1625.

Calculated properly and accurately for the latitude and Meridian of the Honourable City of *London*.

By GEORGE LOVE.

LONDON:
Printed for the Company of Stationers.

## A perfect Table of the foure Tearmes and of their Returnes.

**Hillary Tearme begins Jan. 24. ends Febru. 12. and hath 4. returnes.**

| | | | |
|---|---|---|---|
| Octab. Hill. | Jan. 20 | Craſt. Purif. | Feb. 3 |
| Quind. Hill. | Jan. 27 | Octab. Purif. | Feb. 9 |

**Eaſter Tearme begins the 4. of May, ends May 30. Returnes 5.**

| | | | |
|---|---|---|---|
| Octab. Paſc. | May 2 | Quind. Paſc. | May 23 |
| Tres Paſc. | May 9 | Craſt. Aſcen. | May 27 |
| Menſe Paſc. | May 16 | | |

**Trinity Tearme begins the 17. of June, ends the 6. of July, Returnes 4.**

| | | | |
|---|---|---|---|
| Craſt. Trin. | June 13 | Quind. Trin. | June 17 |
| Octab. Trin. | June. 20 | Tres Trin. | July 4 |

**Michael mas Tearme begins the 10. of Octo. ends 28. Nouem. Returnes 8.**

| | | | |
|---|---|---|---|
| Octab. Mich. | Octo. 6 | Craſt. Anim. | Nou. 3 |
| Quind. Mich. | Octo. 13 | Craſt. Mart. | Nou. 12 |
| Tres Mich. | Octo 20 | Octab. Mar. | Nou. 18 |
| Menſe Mic. | Octo. 27 | Quind. Mar. | Nou. 25 |

**Note that the Exchequer opens 8. dayes before any Tearme begin, except Trinity: in which it opens but 4. dayes before.**

Ember or Faſting-dayes.

The warming luſtre of Sols glorious eye,
Pries in the golden mines which Veſta hides:
Downe to th' eccentricke point to vs moſt nigh,
His fiery Charriot haſtes by winged ſlides.

Dilkhade.

# August hath xxxj. dayes.

Blithe Vesta's smiles implore a late adiew
Of wheeling Phœbus, now in bitter paine,
Her wombed bosome yeelds the fruit which grew
By sporting dallyance with her trimmest Swaine.

Sweet Vesta, pale, silent in mournefull hue,
Intrencht in drooping thoughts of sad dispaire:
With gloomy silence bids her loue adue,
Dissolues the trammels of her gaudy haire.

Rabiez.

Loue. 1625.

# *A Prognostication,*

For the yeere of our Lord GOD, 1625.

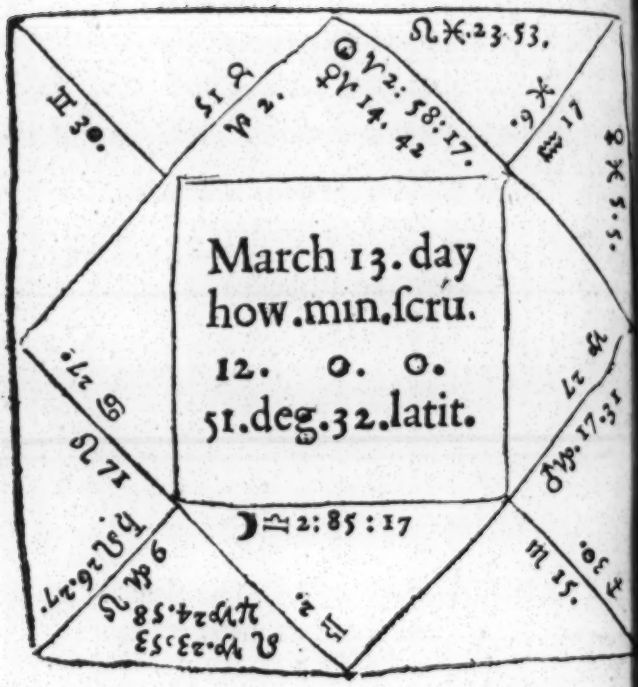

Being the First from the Bissextile *or Leape-yeare.*

Containing Rules profitable for Husbandry and Physicke, *and not vnpleasant obseruations for* discourse.

By *George Loue.*

Printed at London for the Company of Stationers. 1625.

# A Scheme erected of the heauens figure as it is the *Thirteenth day of March, when the Moone offers her ſelfe E-* clipſed to our view.

# The Eclipſes this Preſent yeare, 1625.

There bee Foure Eclipſes this preſent yeare: Two of the Sun, and Two of the Moone, whereof onely the firſt of the Moone is ſeene of vs, being the 13. day of March, or according to the reformed accounts the 23. of March: The Sun being in Aries the 2 deg: 58. 17. the Moone not farre from the dragons head in Libra, 2 deg: 58. 17. The Eclipſe is partiall of 2. digits. 14. 53. the totall duration is one houre. 46. 10. It is ſeene by vs about midnight, and is placed in full meridian to the weſterne parts of England, as North and South Wales, Cornewall, Deuonſhier, &c. Likewiſe to the Ocean Sea, borders of Spayne, as Lisbone, &c. downe to ſtraights of Gibralter. The ſecond of the Moone is 6. of September, or the 16. of the Julian accounts, being alſo partiall contayning 6. digits, 4. and is ſeene to the Inhabitants of China, &c.

The First Eclips of the Sun is the 26. of February or the 8 of March as the accountes beyond Seas reckons contayning 11. digits and almoſt 53. the meridian of this eclipſe lyes weſt from vs about new France and Terra Florida, &c.

The Second Eclips of the Sunne is vpon the 22. of Auguſt, or according to the gregorian accounts 15. of September containing 11. digits and almoſt 4, whoſe true meridian lyes weſt from vs to the Inhabitants of the infortunate Iſle.

# A description of the disposition of the Foure Quarters of this yeare, 1625.

## Winter.

☉ in ♑. ♒. ♓.

This quarter naturally cold and moyst, begins in equall scruple with the suns first entrance in ♑. being 11. day of December, at 9 clocke 8. 12. afternoone: Now old things naturally desire rest. The pores of the body are now shut, cold meates or drinkes are vnholesome, Physicke is rather to be denyed then imbraced: the diseases to which man is most subiect in the space of that time while the Sunne is in ♑. as also of this whole winter are for the most part raw, Phlegmaticke and vndigested humors, as Toothaches, Agues, Palsies, Laskes, Cramps, Coughes, Gowts, hoarsenesse, windinesse, stopping in the breast, cathrs, and all kinds of rhumes, vse therefore meates hot and dry commixt with hot spices as also old wine or stronger drinke. If the winter be raw and moyst, the bodies pores being not so close shut and the ayre raw and vnholesome, certaynely except some of these diseases, by tender care preserue thée by keeping more thy chamber: Now are all sapps or vegatiue humors in trées retired to the roots.

## Spring. ☉ in ♈ ♉ ♊.

This Quarter being hot and moyst begins with ☉ entring ♈. the 10. day of March, at 6. a clocke 18 ′ afternoone: The Sun now by a more nigher approach to vs, his influence is more powerfull exhalling many vapours from the earth, openeth the pores thereof, as also of mans body, drawing the heate which winter inclosed in the inward parts to the outward members when

ence in trées and plants the ſap leaues the roꝛt, and chaled into the bꝛanches, and the heate in man ſtirs the cruder humoꝛs cauſing a great commotion in the by tending to the outwaꝛd parts: whence pꝛo- the theſe diſeaſes, Toth-ach, Agues, ſwimming and neſſe of the head, payne in the eyes, lunges, dia- gme ioynts, ſundery fluxes and ſcabs, as puſhes, hes, Meaſles, ſmall poxe, ꝛc. The diet to be vſed, pꝛeuenting kitching phyſicke is meates ſweéte and ſhing but not too hot, noꝛ thoſe of a vitious & Fleg- icke moyſture as fiſh, ꝛc. noꝛ ſuch as be of a fault na- e, but foules and ſome other of the ſame kind whoſe action may be wholeſome and ſpéedy.

Summer. ☉ in ♋. ♌. ♍.

This Quarter is naturally hot and dꝛy, begins the Sun entring ♋. June 11. day at 2 clocke 5. 37. af- noone. Now a man is weakeſt of digeſtion, there- much meate is to be eſcheWed: Now the poꝛes of body are moſt open, theꝛefoꝛe all ſuddayne colds, all dꝛinkes in ſweating, muſt with no little care be a- ded: now fruit and hearbes haue their crude and ſeſuous humoꝛs exhald c, ſo as they attaine moꝛe ect maturitie: yet if too much heate be together, it s & parches, except in thoſe things whoſe nutritiue ture is altogethe internall & that abundant, now al diſeaſes rage in ☿ body, too much meate oꝛ dꝛink will now pꝛooue to a ſurfet, apoſtumes, inflamations, the bladder, ☿ ſpléne, the liuer, the raines, the ſto- ke, ꝛc. Burning Agues, Pluriſies, headach, ꝛc. the pꝛeuenting, this to be vſed, is cooling hearbs and ts, and that very ſparingly: Exceſſiue dꝛinking, ſtrong dꝛinkes, hot waters oꝛ wines are carefully e auoyded.

## Autumne, Harueſt, or fall of the leafe,

☉ in ♎. ♏. ♐.

THis Quarter by naturall diſpoſition is cold & dry beginning with the Sunnes entrance into ♎. September the 13. day at 2 a clocke 0. 35. after midnight, and continues till the 11. day of December at 9. a clocke & a few ſcruples, becauſe the pozes of the body are not too much open noz ſhut, neither is the ayze hot oz cold, in extreamity, though it be various and differing: the day opens, the night cloſes the pozes: now the mayſture in treés and plants leaues the branches, ſo as the leaues being altogther voyd of ſap, gently fade and fall away: the heate in man recalles it ſelfe to the inward parts: The diſeaſes moſt common, are Gouts, Conſumptions, Dropſies, Coughes, Fiſtuloes, Cankers, Botches, Scabs, Furzes, &c. The preuenting dyet muſt bee meates moderately warme, no hot (as alſo drinkes) opening the pozes of the body, expoſe it to the obnoxious ayze.

## The magnitude of the Seauen Planets.

♄. exceedeth the Earth accozding to Tycho Brahe 22 times: Albateg. 79 times. Alfrag 91 times: he makes his period in 30 yeares. ♃ exceedeth the earth by Tych 14 times: Albateg 81. times. Alfrag, 95. ends his courſe in 12 yea: ♂ is in prepoztion to the earth as 25 to 60 by Tych, viz. 13 tymes leſſer then the earth: Albateg as 7 to 6: Alfrag, he is biger then the earth by one halfe. ☉ is greater then the earth 140. tymes by Tych: by Ptolomy 166. by Copernicus 162. tymes: makes his courſe in 365 dayes 5 hou: and 49. min: leſſe then the earth by Tych. 6. Petolomy, Albete, and Alfra

Mercu. 36 times. ends her course in a yeare. ☿ lesse then the earth as Tycho Brahe 19 times. end her reno-vation in a yeare. ☽ lesse then the earth by Tych. 42 ty. Ptolomy, 39. Coper, 43. tymes, shee ends her course in a moneth.

## To know which part of the Zodiaque, the head of the Dragon is in euery yeare:

If 19 years according to the golden number it passes the 12. signes of the Zodiaque: when the golden number is one ☊ is the 1 of Aries. and for euery whole yeare and 22 dayes it proceeds against the succession of the signes 22 degr: and a halfe, & thus hauing found the place of the dragons head by reckoning against the succession of signes in the opposite deg: and signe is the dragons tayle for the yeare.

## To find the age and the opposite to the Age in the Zodiake.

Reckon according to the succession of signes for euery yeare and 22 dayes 22 deg. and a halfe in the Zodiacke. And know that the prime number being 1 the Ange is in the 1 of ♈. the opposite to the Ange in the 1 of ♎. they finish their motion in 19 yeares, with the golden number, thence you may know when the moon moones slower or faster; when the change sooner or later.

## A briefe computation of times compleat for *this present yeare*. 1625.

## The diuers beginning of dayes, with diuers *Nations, as also of yeares.*

THe Persians, Babilonians, and Norimbergians, reckon the houres of their dayes from sun rise. The Ægyptians, Bohemians, Polonians, and Italians, from Sun set. England, The 17. Prouinces, and some part of Germany, from midnight: Thence as Verstegan thinkes comes our word Seanight, fortnight. Arabians, Vmbrians, and Astronomers at mid-day: The yeares are begun by Hæbrewes and Ægyptians the 21 day of September: The Persians and Grecians, 21 of October: The Florentine, the 25 of March: The Venetian the 1 of March. the Romans the 1. of Ianuary: The Astrologers the 19 of March. Diuines ỹ 25 of December Wee according to the 25. of March.

### Elections for Husbandry.

THe ☽ in ♂ ☌ ☿ ♍ ♑ or ♒. and in a good aspect of ♄ ♃ or ♀ causet) a good time to plant or sow sed or graft:

e: note that the best time to plant is in the 2 d. □
y if not aspected by □ & or ☌ of ♄ ♃ ♂.
fell timber From Midsomer to Christmas, the ☽.
e wane: cut fuell the 1 □ of the ☽ geld cattle the
♈ or ♍. Remoue trees the last quarter of the
twéene Hollantide and Twelfetide. Cut Vines
ebruary or March: but for more peculiar directions
nuary cut downe wood for fiers and buildings, but
the moone bée in the increase, for the same will
e durable, nor the flame pure, but in the decrease
kest from putrifaction, corne now grinded, if kept,
l be vnmouldy: Wine vessels renewed preserues the
from putrefaction: roots, meadowes, and arable
nds vnary the rots of fruitbearing trées: plough
your Date ground.

ebruary prune fruit trées, lop hedges the 2 d □.
e ☽: lay quickset: graft and set trées: sow peale
Oates.

arch in the Northern parts of England, sow beanes
and oates in the beginning: couer the bared rots
ur trées: plant fruit trées: set sage and gourdes:
y out your dung, vnlaid out in February of which
there be three sorts: The best is of Doues, hens,
toules, except fennish geese and duckes which is
same: the 2 d. which Varro commends, is mans
ment mixt with other, being naturally hot, his b=
6 moneths stale or brinish dreges applyed to the
s of fruit bearings tree maks them fructifie, and the
t of better smell and relish: the 3 d. is asses, be=
se the chewes long, and so it is more concocted then
pe and goates: lastly, Cowes and Oxen, but that
ord-breéding: obserue in transplanting trées, to
e the same side West, East, & South, which was
fore: cut dead bowes.

Aprill,

Aprill, set garden hearbs, as mellions, cowc
bers, gourds, sow barley, hempe and flax, which
gile sayth, burnes the ground, therefore husbands
nure it wel.

May, sow barly in the Northerne parts, leekes,
ons, pursline, coriander, smallage, and bassile:
and dung for wheate and rye: sheare sheepe, no
still pour hearbs, preserue your butter and chese,
out to grasse: mend your house walles.

Iune, mow downe your watery meddowes, sow
tender hearbs, seedes, obserue that the Northe
parts of England, may doe that time enough in the
ginning of any Moneth which the southerne did in
latter parts of the Moneth preceding.

Iuly, put vp your sheepe to fat, wash your hogs fr
filth, cut down your high meddowes, & your hard co

Auguſt, downe with hard corne, as rye & wheate,
in the end of the moneth, oates, pull your fruit, p
fuell, hempe.

September, reape barly, beanes, peale, make y
diches, now the earth is best crase helpe.

October, Sow whete and Rie, make ditches in
beginning, lop hedges, set plum, peare, walnut,
appletrees: walles made now are as good as in M

Nouember, fallow your barly land, also close vp y
bee-hiues, cut and cleaue your trees in the ♂). tra
plant trees.

December, fallow barly land, cutt timber to build
burne, cut hedges, and almost what else, as is pres
bed in Ianuary.

## Elections for Physicke.

HIppocrates part the 4. Aphor 5. Physicke is dang
ous in dogdayes: and part 6 Aphor 46 Spring a
Autum

ne are moze conenient then Summer oz Win=
by which he meanes times extremity hot oz cold,
ch dangerous foz Physicke, yet hee meanes not
ly dangerous, foz part 4. Aphor 4 hee commends
r foz the lower parts, winter foz the higher, by
meanes if necessity vrge in Summer it must
vomit: in winter by purgation.

5 in ♀ not combust, helps to euacuate choller. ⊙ auaileth in purging phlegme ♃ helps to expell melancholy. } with electu aries
oz △
nt.

m in ✶ △ alpect ♀ not combust, good to purge choller and so with ⊙ and ♃ hath the same effect if you purge by potions.

)in ☌ in a ✶ oz △ alpect with the foresaid ♀ ⊙ oz ♃
the same particuler effects, if you purge by pilles

## Cautions for purging medicines.

et not the ☽ be in the signes that chew the cud, oz
with a planet retrograde, foz they cause vomit: noz
ct of ♄ oz ♂ the one by heat, the other by cold hin=
s.

If ♄ influence be strong, purge not the splene: If
not the liuer, if ⊙ not the heart: if ♀ not the lungs:
♂ not the gall: if ♀ not the members of generation:
he ☽ not the braine.

Ptolomy and Haly, thinke the humors from the ♂ ☽
the 1 □. and from the ♉ ☽ to the 2 d. □ moue from
e inward parts of the body to the outward: and from
e 1 □ to the ♉, & from the last □ to the ♂ ☽ they moue
om the outward parts to the inward: therefore in the
and 3 d. weekes of the ☽ apply externall euacuations
the 2 d. and 4 weekes apply internall.

Cautions

Cautions for corroborating the vertues of mans body. ♀ gouerns man in the mẽbers of generation: ☉ the hart ♃ the liuer: ☿ the braine: ☉ in ♈ ♐ and the one half of ♒ the Attractiue: ♃ in ♊ ♎ the disgestiue: ♄ in ♑ and ♍ the retentiue: ☽ in ♋ ♏ ♓ the expulsiue. Being to corroborate any of these parts, see that the aspect of the planets gouerners be not infortunate.

## Of Bather.

If you bath for cleanenesse, let the ☽ be in ♎ or ♓ in a good aspect of ♀: if for health, if the disease be cold and moyst, let the ☽ be in fiery signes aspected by ☉: if the disease be hot and dry, let the ☽ be in watery signes aspected of ♃ or ♀.

## Of Phlebotomy.

Aspects hindering extraction of blood are the ☽ in ☌ with ☉ which hinders a day before and a day after: so with ♄ or ♂: but with ☿ or ♀ it hinders but 12 houres before or after: The ☽ in □ with ♄ ☉ or ♂ hinders but 6 hour: before or after.

Aspects auspitious for phlebotomizing ☽ in ✶ or △ with ☉ ♂ or ♄ if in good signes, good: so ☽ in □ or ☍ with ♃, or ♀ not combust, so ☽ in ♂ ✶ or △ with ♃ or ♀ not combust.

Let blood the sanguine from the ♂ ☽ to the first □ the collericke from the ☌ to the ☍: the phlegmaticke from the ☍ to the last □: the Melancholy from the last □ to the ♂.

Take
- Purge by neezing — The moone in ♋. ♌. or ♏.
- Vomit. — ♂. or ♑.
- Glisters. — ♈. ♎. or ♒.
- Gargarismes. — ♋. or ♈.
- Preparatiues. — ♊. ♎ or ♒.
- Stop rhumes & flux — ♂. ♏. or ♑.

¶ The tymes of Sun-rise and Sunne sett the seuerall changes of the Moone.

## Ianuary.

The Sun rise the 10 day at 8 a clocke, and sets and 12 minu: after: the 20 day the sun rises clocke 43 min: and sets at 4 and 27 min: the 31 da sun rises at 7 clocke 22 min: sets at 4 and 45 mi

☽□ first quarter the 5 day at 1 clocke 46 min: a noone.

☉☍ Full moone the 13 day, 40 min: after din

☾□ Last quarter the 21 day at 2 clocke and 7 m aftenoone.

☉☌ New moone the 28 day, at 7 clocke 7 min: i morning.

## February.

The sun riseth the 11 day at 7 clocke, and sette 5 a clocke 5 min: the 20 day the sun riseth at 20 m before 7. and sets at 23 min: after 5. the 29 day the riseth 38 min: before 7. and sets 40 min: after 5.

☽□ First quarter the 4 day at 4 clocke and 11 m in the morning.

☉☍ Full moone 12 day at 7 clocke 44 min: t morning.

☾□ Last quarter 20 day at 1 clocke 49 min: i morning.

☉☌ New moone 26 day at 5 clocke 11 min: a noone.

## March.

The sun riseth the 10 day at 6, and setteth at 6. 20 day the sun riseth 19 min: before 6, and setteth min: after 6, the 31 day the sun riseth at 44 min: be 6. and setteth 41 min: after 6.

☽□ First quarter 5 day at 8 clocke 41 mi: at m

☉☍ Full moone 13 day, 58 min: after midnight.

☐ Last quatter 21 day, a 9 clocke 53 min: before=

☌ New Moone 28 day at 3 clocke 13 min: in the ing.

## Aprill.

The Sun riseth the 8 day about 5 clocke and setteth after 6. the 19 day the sun riseth 24 min: before setteth a quarter after 7. The 30 day the sun ri= 3 quarters before 5. and setteth halfe an houre min: after 7.

☐ First quarter 4 day at a clocke 33 min: after

☍ Full moone 12 day at 3 clocke 16 min: in the af= ne.

☐ Last quarter 19 day at 4 clocke 30 min: in the oone.

☌ New moone 26 day at 1 clocke 52 min: after= r.

## May.

he sun riseth the 9 day at 4 clocke & setteth 3 quar= after 7. the 21 day the sun riseth a quarter before 4 setteth at 8 clocke: the 31 day the sun riseth 25 min: 4 clocke, and setteth 7 min: after 8.

☐ first quarter 4 dae at 8 clocke 58 min before noone ☍ Full moone 12 day at 2 clocke 32 min: in the mor.

☐ Last quarter 18 day at 9 circke 46 min: at night.

☌ New moone 26 day at 1 clocke 19 min: in the ng.

## Iune.

The sun riseth the 10 day halfe an houre before 4. & setteth 10 min: after 8. the 20 day the Sun ri= 16 min: before 4, and setteh 8 min: after 8. The day the sun riseth 16 min; before 4, & setteth 1 min: night.

☐ First quarter 3 day at 2 clocke 34 min: in the ng.

☌ Full moone the 10 day at 11 clocke 33 min noone.

☾□ Last quarter the 17 day at 3 clocke 26 min: the morning.

☌ New moone 24 day at 2 clocke 6 min: aft dinner.

July.

The sun riseth 14 day at 4 clocke, & setteth a quart before 8. The Twenty Three day the Sunne ri a quarter after 4 & sets halfe an houre wanting 3 m before eight. the 31 day it riseth halfe an houre after and setteth 20 min: after 7.

☽□ First quarter the 2 day at 6 clocke 17 min: b fore sunsett.

☌ Full moone 9 day at 7 clocke 8 min: at night.

☾□ Last quarter 16 day at 10 clocke 29 min: befo dinner.

☌ New moone 24 day at 4 clocke 40. min: in t morning.

Auguſt.

The Sun rises the 7 day, a quarter before 5 & se 4 min: after 7, the 16 day the sun rises at 5 and sets 7 min: before 7. the 31 day the sun rises at 34 min: ter 5 and sets halfe an houre after sixe.

☽□ first quarter 1 day 7 clocke 4 min: in ♑ morni

☌ full moone 8 day at 2 a clocke 34 min: in ♑ mor

☾□ Last quar: 14 day at 8 clocke 3 min: at night

☌ New moone 22 day at 8 clocke 48 min: at night

☽□ first quarter 30 day at 6 clocke 38 min: at nig

September.

The Sun rises the 16 day at 6 clocke, & sets at 6. day and night being of equall length: the 21 day Sun rises a quarter after 6. & setteth 45 min: after The 30 day the sun riseth 35 min: after 6 & setteth min: after 5.

C

☌ Full moone 6 day at 10 clocke 33 min: before noone.
□ Last quar: 13 day at 9 clocke in the morning.
☌ New moone 21 day at 1 clocke 39 min: after dinn.
□ First quar: 29 day at 3 cloke 57 mi: in the moz:

## October.

The Sun rises the 12 day at 7 clocke and sets at 5 before 5. the 19 day the sun rises a quarter after 7 and 10 mi: before 5. the 31 day it riseth halfe an hou: 9 min: after 7, and sets halfe an houre before 5.
☌ full moone 5 day about 8 a clocke at night.
□ Last quar: 13 day at 2 clocke 5 min: in the mozn:
☌ New moone 21 day at 6 clocke 3 min: in the moz.
□ first quarter the 28. day at 27 min: afternoone.

## Nouember.

The sun rises the 12 day at 8 clocke and sets three quarters before 5. the 23 day, the sun riseth a quarter after 8 & sets at 4. the 30 day the sun riseth 22 minnts after Eight, and setteth 5 min: after 4 of the clocke.
☌ Full moone the 4 day at 7 clocke 16 min: moz:
□ Last quarter the 11 day 10 clocke 14 min: at night.
☌ New moone the 19 day at 9 clock 21 min night.
□ first quarter the 26 day at 8 clocke 42 min: at night

## December.

The Sun riseth the 11 day halfe at houre after 8. & sets 10 min: before 4: which is the shortest day in the yeare. the 21 day the sun riseth 22 min: after 8, & sets 8 min: before 4. the 31 the sun riseth 12 min: after 8 and setteth about 4 a clocke.
☌ Full moone the 3 day at 9 clocke 1 min: at night.
□ Last quarter 11 day at 8 clocke 53 min: at night.
☌ New moone 19 day about 12 clocke at noone.
□ first quarter 26 day at 5 clocke 21 min: in the moz.

¶ A ſhort rehearſall of the Turkiſh yeare an
ſwerable to the *Arabian* Calender being
*the 6 colume of the Almanacke.*

THe *Arabians* not much differing from the *Hebrews* haue their yeare conſiſting of twelue lunar Monethes ſome of which comprehend 29 dayes, ſome 30. The Moneth is but one ſcruple defectiue of the Iewes, that is 29 dayes, 12 houres, 44 minuts, in imitation of whom they deuide their yeare into common and intercalated, the common conſiſting of 354 dayes, the intercalation makes them 355 dayes, to both which 8 hou: and 48 min: muſt be added, and as the Iewes make their cyrcle of yeares to be the number of 19, ſo theſe Arabians ordayne a limited circuit, being 30. yeares exceeding their number, wherof they account by this diuiſion, viz. Their yeares participating of intercalation are 2. 5. 8. 10. 13. 16. 19. 21. 24. 27 30. their common yeares are 1. 3. 4. 6. 7. 9. 11. 12. 14. 15. 17. 18. 20. 22. 23. 25. 26. 28. 29. and not diſſenting from the accounts are the Indian ſupputations, whoſe yeare begins three dayes before the Turkes, which nation as being by diſcent from Mahomet or Machumet true Arabians, varie not their yeare from this ancient Calender: and of whoſe rites I will inſiſt by ſhort diſcourſe. Abdalla or Abdallet the apparent father to Machumet, if their relations be credible, was the Captaine either Elect, elſe Hereditarie and prime ruler of Arabia, (the perſeruation of whoſe life by report miraculous, I omit as friuolous) and after many dayes had warranted his eſpouſals and effected a certainty of legitimation to his firſt borne, he not vnaccompanyed with the Arabian Peeres tooke view of his hou

by curious proſpectiue, who liuely diſcerned a cæ-
ll luſtre to inueſt his palace, by continued beames
ate from the heauens, which was the ſuppoſed day
Mahomets conception, being vpon Fryday night in the
neth *Dhulkade*, agreeing to our Auguſt, which ſame
s called *Arraſia* being the beleeued ſeaſon of Paradiſe
s firſt opening, ſhortly after which light *Abdalla* dyed
in the ſecond feria, was this Poſthume, namely Ma-
et borne: being the 12 day of *Sahaban*, which is coin-
nt to the 10 day of our May: his raigne was 10 yeares,
which ſpace he grounded the Turkiſh Empyre, and e-
liſhed their religion, the ſacred booke for whoſe di-
ion, hee cals *Alchoran*, which ſignifies a collection
ecepts, and the *Saracens* ſtile is *Alſurtan*, that is diſ-
meſentences, which booke he ſayes was ſent him from
en the firſt day of *Ramadan*, which is the 8 of May,
diſcended continually the ſpace of 15 dayes, at which
od, being the 15 of *Ramadan*, that is the 11 of Iune,
s deliuered into his owne hands, which he kept tru-
publiſh, to them his people, in which is contayned
merable blaſphemies, as there is ſcarce any *Azoara* or
pter, without a contradicting of Chriſts deity: being
rke both confuſed and quite oppoſite to reaſon, as
rein he enioynes a beliefe of only ſeauen Heauens, and
God will ſweare by the diuels, &c. In the Second
ra of this *Alchoran* he inſtitutes the Turkes, one ge-
al and ſolemne faſt, in the moneth *Ramadhan*, which
continue 4 weekes, and an abſolute abſtinence is to
ſolemnely performed in the day, but the night is law-
for feaſting, and being glutted with women in a vene-
luxury: by which command tis manifeſt that the
continued the whole Moneth of *Ramadhan*: which
ng ended they are to keepe a paſſouer three dayes an-
ting their nailes and clenſing themſelues by innu-

merable washings, being about the 29 of Iuly, he also in
ioyned the Turkes 10 dayes of pilgrimage, three of whic
are to bee spent in visiting of *Mecha*, and seauen con
sumde in fasting after their returne of this Citty *Mec*
which the Turkes penuriously hast vnto by yearely visit
tions, as the Iewes did to Ierusalem: the *Saracen* Turke
as a matter of faith imbrace this fabulous story conuoyze
in their *Alfurkan*: That Noah in the vniuersall delu
being entred the Arke, lanched himselfe first to visite th
Citty *Mecha*, and then *Hierusa'em*, in compassing seaue
times round about either of these Citties: The latter o
which God intending to preserue, had closely intomb
within the hollow mountaine *Abikobez*: but intendi
a more speciall preseruation of *Mecha*, he eleuated it vp b
his power into the Heauens. This Citty Mahomet visite
4 times in the Moneth *Dilkade*, which is answerable t
August in the Moneth *Regab*, that is Aprill, hee bilt th
famous Temple in *Tambick*: the first publishing to th
people of his *Alcoran* was in *Dilkade* or August, where
he spent fiue dayes in rehearsall of his Statutes: on the t
day of *Rabie*, the first that is the 2 of December Mah
met dyed in the *Jetrib* and was carried about foure day
after and intombed in *Mecha*: Whither the Turkes go
by dayly Pilgrimage to visite his holy Sepulcher: Th
*Saracen* Turkes haue these stories following in their *A*
*furkan* which is them equall o fauthority as the Gospell
with vs: And first to begin with the Moneth *Ramad*
which they value in equall estimate with the Iewes *Nis*
or *Abib* on the 20 day of this Moneth, which is the 6,
Iune, they beleeue that God sent downe from heauen th
booke of Psalmes into the hands of Dauid, and that in th
22 day God pardons him his sinne of adultery, on the 1
day Salomon was borne, & on 29 of Iune they say Chri
the Sun of Mary, (a Prophet, but not God) was born
who

…e doctrine the Gentil…s, haue corrupted by making
…more then he euer was, a God, a Sauiour, and media-
…r their ſinnes vpon the 24 of *Ramadhan* which is the
…June God ſpoke vnto Moſes the morrall Law and
…andements: on the 26 day, that is the 22 of Iuly
…receiued the tables of ſtone with the written Law
…wefull finger of almighty God: and on the 30 day
…went vp to mount Sion (which is the 26 of Iuly) to
…to God, which the Turkes ſay is the firſt earth that
…God ſpoke vnto, which hee commanded to lift Moſes
…heauen to talke with him face to face, which the
…did, & Moſes thence was made incapeable of death;
…ce they beleeue no leſſe true then we our creede, that
…ſon why Moſes Sepulchre was neuer knowne, was
…grounded: that on a time as he leaſurely walked the
…rowling his eyes to eſpye a monument, he playnely
…med a poliſhde graue, into which after a little delibe-
…he gently deſcended, and lowly declining, leuels
…lfe with the playne bottome of the tombe, whence
…ceiued an admirable fitneſſe duely preportioned to
…ody: to whome in this good humour, death by an
…ſtealth vnuailes barely, certifies him that hee muſt
…; But Moſes no whit fearefull anſwereth in a cheare-
…ſmile, how can my life be taken from me, ſeeing my
…can haue no paſſage from my body, my mouth hath
…en to God, my eares heard his Lawes, my hand re-
…ed his Teſtimony, my eyes haue ſeene his face, my
…hath touched mount Sinai, all are certaine impedi-
…ts to death: but the angell by quick diſpatch returnes
…an Apple from paradice, which Moſes no ſooner
…ga to ſmell but the Angell of death apprehends him by
…noſe, and thence pinches out his ſoule, and ſo he dyes:
…the 25 day of *Ramadhan*, that is the 21 day of Iuly,
…es made that diuiſion of the Sea by that poore ſtroke

of his little wand which inforced the waters as a wa
them, & ouerflowed Ægypt in the ſwelling maine: whe
they anſwer in their *Alfurcan* that the bottome of the
is the little skirte of the ſandy ground which the Sun
ner ſawe bnt once from the creation, and ſhall behold
more till the worlds end, which will be ſhortly as they
poſe, but the continuance of the iudgement day with
in: ermiſſion, will be 50 thouſand yeares.

They propound a ſecond riddle, which is, what ſho
be the graue which moued with the intombed body:
which the Turkes beleeues this, the anſwer that it w
*Ionah* impriſond in the belly of the whale, which he ent
the 17 of *Ramadan* which was the time of his being
out of the ſhippe which is the 23 of Iulye. I ſhould
paſſe on to the other Monethes, and ſo relate more of
Turkiſh rites and ceremonies, but my feare of
being too tedious, preuents my further diſ-
courſe, rather deſirous to obſerue
the limits of an Almanacke,
then the leaſure of an
Hiſtorian.

The Towne of *Steuenage* in *Hartfordſhire*, is made a Market Towne for euer hereafter, to be kept weekely on the Fryday.

And Three Fayers yearely to bee kept in the ſame Towne, that is to ſay, on the Fryday before *Palme Sunday*; On *Aſcenſion day*; and on St. *Swithens day*.
